

T1 — Beco dos Descalços

Target visual

Night favela/periphery district with warm sodium lighting, dense but curated architecture, coherent streets, integrated vegetation and intentional props.

Core rules

- Main avenue remains the navigation spine.
- Side alleys must read as real connections, never decorative cut-ins.
- Every prop must support circulation, architecture, urban ambience, nature or territorial storytelling.
- Landmarks remain recognizable: Barraquinha, Mercado, Beco 01, Mirante/Laje do Ponto, Comando do Beco.
- Warm light pools against a darker neutral base; avoid random neon saturation.
- Vegetation is used to stitch edges, soften geometry and add lived-in character.

Forbidden legacy language

- floating crates or pallets without purpose
- generic parking bars / access stripes
- duplicate street-life clutter
- repeated rectangular ground pads
- fake road entrances
- props that overlap landmark silhouettes

Production priority

1. ground + road edges
2. landmark grounding
3. vegetation system
4. lighting hierarchy
5. curated prop kits
6. final atmosphere
